

***Havant Borough Environment Group Online Questionnaire is the joint venture of numerous cross-Borough volunteer conservation and residents groups. Our intention is to highlight resident's priorities for their surroundings.***

Few people can be unaffected by ever increasing alarms about the state of our environment; polluted air and water, Climate Change impacts, threats from extreme weather events, lack of green space and recreation space for a rising population and the rapid rise in endangered species make frequent headlines.

Here in Havant Borough, we need to focus on the particular local environment issues that need attention in the new Local Plan 2036

Please click on the link below to bring up the online survey so we can make sure Havant Borough Council can make appropriate and effective plans to address community concerns.

Your views and will be added to the data base and a report published and sent to Havant Council
